PREMAS LIFE SCIENCES

SPEARHEADING A NEW ERA IN LIFE SCIENCE TECHNOLOGY

Incepted in 2011 by a team of highly experienced and proficient professionals, Premas Life Sciences Private Limited (PLS) is engaged in sales and distribution of molecular biology, genetics, genomics and proteomics state-of-the-art solutions for the Indian Research and applied markets

Ots major claim to fame has been its robust partnership with the global genomics leader Illumina Inc. for the past many years, which has fostered an entire ecosystem of cutting edge research, service models and employment for many. The partnership has also contributed to some amazing milestones in Indian research, spanning human genome sequencing, bovine genomics, cancer consortium efforts, stress tolerance in legumes or interrogation of genomes of many indigenous plants and animals.

Over the years, PLS's dedicated and persistent client-centric approach has transformed this enterprise from a young start-up to an established leader with a

CAGR of 60% in a very short span of time.

RYING FOR APOGEE OF GLORY

In its endeavors to reach the pinnacle of glory, PLS has attained unbelievable success in the Indian Lifescience industry landscape. Today the company partners with the choicest brands in the genomics and cell biology domains, enabling researchers and clinicians to use these niche tools for their experimental/ clinical outcomes. Moreover, it has engaged a large number of domain experts in its team with the prime motive of boosting research in the field, besides promoting start-ups in the country. It has also played a conduit for several academia-industry partnerships, thereby channelizing bench discoveries to

get commercialized.

CLIENT SUPPORT

PLS has also set up a mechanism for providing proper training to customers by a team of highly-skilled, talented and knowledgeable professionals. The team educates clients about the scope of the technologies representing the applications of the products, experiment planning, troubleshooting and carving the road ahead, ensuring that customer satisfaction is served at priority.

AVANT-GARDE INITIATIVES

The enthusiasm displayed by the company to grab the opportunity of tapping the latest biomedical tools for sequencing, diagnostics, synthetic biology - manufactured by global giants like Illumina, Fluidigm, 10X genomics etc. has tremendously boosted the popularity of the company. Apart from being a torchbearer in the Lifesciences domain, the company is equally paving a way in forward-looking initiatives to support the welfare of children through several CSR activities.

A VIBRANT WORKPLACE

With a predominantly young team raring to go, the company invests in setting up a conducive and consistent learning and development ecosystem for its workforce. The organization prides itself on having a driven, yet congenial atmosphere, where peers work closely together and perform like a team. Work is suitably mixed with leisure, and quality recreation.

PHENOMENAL DIVERSIFIED GROWTH

The organization has been recognized as India's biggest brands and ranked second in the Top bio-distributors by Biospectrum India. The firm can rightly boast of rare and exclusive contribution to the country's research mechanism by providing some of the most creative and time-tested tools. With a yearly business of 184Cr & an annual growth rate of 27% annually, PLS looks forward to keep unveiling exciting technologies for the advancement of human health.
